## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 39-44, drawn to an apparatus for wet granulation.

Group II, claims 45-58, drawn to a method of wet granulation and a product made with that method.

The special technical features which link the claims of groups I and II are a transporting means, a first transport zone, an agglomeration zone, a second transport zone and the fact that the granules are not subject to a pressure gradient upon discharge. Whether or not any particular technical feature makes a "contribution" over the prior art and therefore constitutes a "special technical feature" is considered with respect to novelty and inventive step. (MPEP [R-6] 1850 II.) As evidenced by Sugano et al. (US 4,416,606), the claimed technical features are known in the art. Sugano et al. teach a first transport zone (part I), an agglomeration zone (part II), a second transport zone (part II<sub>2</sub>) and not subjecting the granules are not subject to a pressure gradient upon discharge (fig 2, 5). Therefore, the special technical features fail to define a

contribution over the prior art and unity of invention is lacking between these two groups.
